

product introduction:

small sample

Theo EPS cement sandwich wallboard is a kind of lightweight and non-loading bearing composite material board, which uses the thin fiber cement or calcium silicate board as surface and filled with cement, EPS polystyrene foam particles, and fly ash as core materials. The product has series features of solid, light weight, thin body, high intensity, impact resistance, strong hanging strength, heat insulation, sound insulation, fireproof, waterproof, easy cutting, grooving and environment friendly. Compared with other wall materials, Theo wallboard has the incomparable advantages, It is widely used in the outer walls, interior wall and roof of various types of the high and low-rise buildings.

Specification: Length:2270/2440mm, Width:610mm Thickness:60/75/90/100/120/150mm for option

Mark:60/75/90/100mm used for partition wall, and 120mm/150mm for exterior wall usually

product features

Energy Saving
& Heat preservation

Light Weight

Fireproof

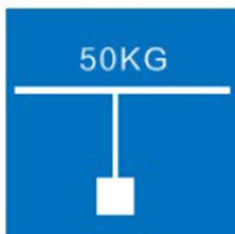

Sound Insulation

Waterproof
& Moistureproof

Anti-seismic

High Hanging Strength

Slotting & Wiring

Easy to decorate

Save living space

- Theo wall panel is made of eps, better effect of heat insulation and energy saving.
- Made of cement, sand, better impressive strength, 3.5Mpa on average, 5.0Mpa for 120mm thickness.
- Made of cement, sand, calcium silicate board, better fireproof and waterproof effect.
- Weight is about 60-70kg/sq on average for different thickness, easy to carry and install.
- Environment friendly, from production to installation, no pollution.

COS Guizhou Theo Light Weight Energy Saving Board Co.,Ltd

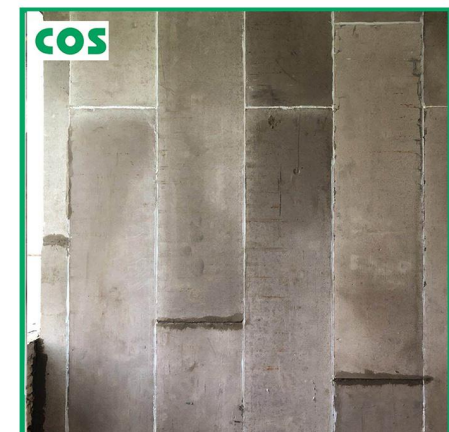

Economic benefits for Theo wall panel

- Fast installation,for big size of our panel,one worker can finish 20 square meters per pay at least,save much construction time and labour cost.
- Save space,our 75mm thick wall panel can replace 120mm thick brick, and no need to plaster,it can increase 4% valid space for partition wall.
- More comfortable living conditon, our wall panel is designed for modern building with many multiple features

Application

Specification	Weight:kg/PC	Usage
2270*610*60mm	47	For roof/partition wall
2270*610*75mm	66	Partition wall
2270*610*90mm	78	Partition wall
2270*610*100mm	87	Exterior wall/Partition wall
2270*610*120mm	98	Exterior wall
2270*610*150mm	147	Exterior wall

Our wall panel is designed to replace bricks for modern prefabricated building,it can used as partition wall,exterior wall,roof,floor in all kinds of building,such as renewed building,hotel,hospital,commerical building,residential building,village house,fense,prefab house,warehouse ect.

COS Guizhou Theo Light Weight Energy Saving Board Co.,Ltd

COS Guizhou Theo Light Weight Energy Saving Board Co.,Ltd

About us

Guizhou Theo Board Company built in 2014, belongs to Guizhou Theo Group in Guiyang, China. We work on exterior wall decoration since 1996. From 2007, Guizhou Theo Board specialize in light weight energy saving wallboard manufacture, sale and installation. At present, our annual output of panels reach 2000,000 square meters, top 5 manufacturer in China.

Theo Group actively respond to the new wall policy, and absorb advanced technology, we have successful produced the wall panels that meets the demand of modern building, such as EPS cement sandwich panel, solid core light weight wall panel, high effective anti-crack mesh, adhesive cement mortar ect. We also help many factories built their own production line like ours in different states.

Theo Board Company insists the principle of "Best quality" & "Best service" all the time, we warmly welcome new and old customers to visit us and for a long-term cooperation.
